PROFESSIONAL SUMMARY

Data Analyst with a software engineering foundation, skilled at turning raw data into clear, actionable business insights using SQL, Python, Power BI, and Excel. Hands-on experience in data cleaning, data modeling, ETL, dashboard development, and KPI reporting across finance, retail, and marketing projects. Comfortable working with relational and non-relational databases and translating business questions into data-driven answers.

TECHNICAL SKILLS

Power BI • SQL • Python • Excel • Tableau • DAX • MySQL • Git • Statistics • Data Cleaning • Data Modeling • ETL • Exploratory Data Analysis (EDA) • Data Visualization • KPI Reporting • Business Intelligence

PROJECTS

Finance Analytics Dashboard

Power BI, DuckDB, SQL

- Built an end-to-end Power BI finance dashboard over **~20,000 general-ledger transactions** across 7 stores and 2 sales channels (Norway & Sweden), delivering consolidated P&L and operational KPIs.
- Diagnosed and corrected a sign-convention error that had **inflated operating margin to an implausible 399%**, restoring accurate profitability reporting.
- Engineered a **DuckDB medallion architecture (Bronze/Silver/Gold)** feeding Actual vs. Best/Worst-case scenario analysis for budgeting decisions.

Marketing Analytics & Sentiment Analysis

SQL, Python

- Analyzed conversion, engagement, and ~400 customer reviews with SQL and Python (**NLTK VADER sentiment**), classifying 275 positive vs. 82 negative reviews.
- Surfaced conversion swings from **4.3% to 18.5%** and a 3.7/4.0 average rating, recommending seasonal campaigns on top categories and fixes for sub-3.5-star products.

Retail Customer Shopping Trends Analytics

SQL, Python, Power BI

- Analyzed **3,900 transactions across 18 features** with SQL and Python, segmenting customers into Loyal (3,116), Returning (701), and New (83) and finding 73% non-subscribers driving ~\$170K revenue.
- Built Power BI dashboards on category performance (Clothing \$104K, Accessories \$74K) and a \$59.76 average basket, recommending incentives to convert non-subscribers.

Additional projects: Sales Performance Dashboard (Power BI, DAX) • Insurance Claims Analysis (Power BI, DAX) • Coffee Shop Sales Dashboard (Excel) • Student Depression Survey Analysis (SQL, Tableau).

PROFESSIONAL EXPERIENCE

Software Engineer (Data-Focused) | Sadeem Informatique

Remote | Nov 2025 - May 2026

- Built data-driven web platforms for enterprise clients (telecom, non-profit, manufacturing) enabling structured data collection, processing, and reporting.
- Developed reporting features and operational dashboards that **reduced manual data tracking by 20% and saved ~5 hours per week**, while ensuring data quality in a cross-functional Agile team.

Software Engineer | GO Platform

Remote | Aug 2023 - Dec 2024

- Designed and maintained data pipelines and APIs ensuring accurate, consistent data flow across services.
- Managed and queried databases to support reporting and application logic, **improving data retrieval efficiency by 10%**, and translated stakeholder requirements into solutions.

Software Engineer (Internship) | LOGITRANS

On-site | Jan 2023 - Jun 2023

- Modeled and integrated relational databases for an enterprise system; performed data validation and testing to verify quality of reporting outputs.

EDUCATION

Master's Degree, Computer Science — Natural Language Processing (NLP) · Saad Dahleb University, Blida, Algeria

Bachelor's Degree, Computer Science — Software & Information Quality (SIQ) · Saad Dahleb University, Blida, Algeria
